the preface the author addresses the issue of cooperation after the end of the soviet empire and with the renewed dominance of the united states in security matters as well as recent scholarship on cooperation

after hegemony has had a huge impact on policy debates over the last three decades hegemony means the social cultural ideological or economic influence of one dominant group and keohane asks if international cooperation can survive in the absence of a single superpower

robert o keohane s after hegemony is both a classic of international relations scholarship and an example of how creative thinking can help shed new light on the world since the end of world war ii the global political landscape had been dominated by two superpowers the usa and the ussr and the tense stand off of the cold war but as the cold war began to thaw it became clear that a new global model might emerge the commonly held belief amongst those studying international relations was that it was impossible for nations to work together without the influence of a hegemon a dominant international power to act as both referee and ultimate decision maker this paradigm neorealism worked on the basis that every nation will do all it can to maximize its power with such processes only checked by a balance of competing powers keohane however examined the evidence afresh and came up with novel explanations for what was likely to come next he went outside the dominant paradigm and argued for what came to be known as the neoliberal conception of international politics states keohane said can and will cooperate without the influence of a hegemonic power so long as doing so brings them absolute gains in the shape of economic and cultural benefits in keohane s highly creative view the pursuit of national self interest leads naturally to international cooperation and to the formation of global regimes such as the united nations that can reinforce and foster it

this edited volume revisits the idea of the western hemisphere first articulated by arthur p whitaker in 1954 but with origins in the earlier work of herbert e bolton it is the idea that the peoples of this hemisphere stand in a special relationship to one another which sets them apart from the rest of the world whitaker 1954 for most scholars of us latin american relations this is a curious concept they often conceptualize us latin american relations through the prism of realism and interventionism while this volume does not deny that the united states has often acted as an imperial power in latin america it is unique in that it challenges scholars to re think their preconceived notions of inter american relations and explores the possibility of a common international society for the americas especially in the realm of international relations unlike most volumes on us latin american relations the book develops its argument in an interdisciplinary manner bringing together different approaches from disciplines including international relations global and diplomatic history human rights studies and cultural and intellectual history

postwar japan has consistently maintained close cooperation with the united states over the last four decades over such major issues as japan s recognition of china their peace treaties and more recently japan s resumption of the yen loan to china suspended in the wake of the tiananmen incident this has been in spite of japan s well known conflict of interests in china with the united states japan s cooperation with the united states sheds new light on some important questions which are central to current debates about the shape of the new world order in general and america s world role in particular in the post cold war era what has been the role of american power in maintaining japan s cooperation what have been the bases of american hegemony in the post war world how has american hegemony changed over the years qingxin k wang addresses and illuminates these important questions through a detailed and provocative study of japan s relations with the united states over china policy in the last four decades

this book offers an important chronological perspective on the evolution of multilateralism within europe and beyond it provides a critical reconstruction of the history of the idea and praxis of peaceful global governance a comparative analysis of regional multilateral organisations and a discussion about concrete trends and perspectives of a new multilateralism against the challenging

context of the current multipolar power politics focusing on the changing european interplay with multilateralism from eurocentric cradle of civilian cooperation among sovereign imperial states to political dwarf after the two world wars and decolonisation and to potential co leader of a multilayered and multi actor cooperation within the current multipolar order it addresses a theoretical gap by fuelling the long recognised idealism v realism debate over international cooperation and institutionalisation with both historical and new empirical insights this book will be of key interest to scholars and students of european studies global governance multilateralism international organisations and more broadly international relations

some scholars emphasize the importance of a hegemon in creating a regime and giving it momentum this is called the hegemonic stability theory the united states for example has been instrumental in creating the bretton woods system with organizations such as the world bank and the international monetary fund the rationale is that a hegemon being the dominant actor in international politics and economics often stands to gain the most from the creation of global standards for instance while other countries might benefit from it u s companies like microsoft universal studios and pfizer would be among the greatest beneficiaries of a strict global intellectual property regime as the hegemons use their power to create regimes their withdrawal similarly can also threaten the effectiveness of regimes regimes serve crucial functional needs in international relations powerful regimes are considered by some scholars as independent actors in international politics although ultimately states create and sustain regimes once institutionalized regimes can exert influence in world politics that is practically independent of state sovereignty the international atomic energy agency for instance has certain rights given to it by states themselves to monitor nuclear energy activity in countries insofar as they are organized by means of treaties among countries regimes provide an important source of formal international law regimes themselves can also be subjects of international law this book tries to unravel that ideology and to create an alternative vision of a just and democratic world over contents international regime theories of international regimes applying regime theories regime change state cartel theory critiques of the theory of international regimes conspiracy theories world systems theory new international economic order unchanged role of nation states

in international relations reciprocity describes an environment in which states support one another for short or long term advantage through the balancing of rights duties and interests this book examines reciprocity in the context of international law it considers the role reciprocity plays in the creation and development of international law as well as in the interpretation and application of international law the book illuminates the reciprocal framework of international law and international relations by examining the role reciprocity plays in different types of states obligations including bilateral bilateralisable multilateral non bilateralisable multilateral and obligations erga omnes the book examines how reciprocity is intertwined with the principle of equality as the rights and obligations of states are equal irrespective of size and economic or military strength and the beneficial effects of reciprocity in creating stability and cooperation amongst states

china is rapidly changing and its role in the world is becoming larger with each transformation as china s economic and political power grows western nations must develop better ways of dealing with chinese ambitions on the world stage in this compelling work michael mccoys urges american policy makers to move beyond past perceptions of china as a political threat and an economic gold mine to consider chinese political identity and actions from a chinese perspective he investigates american and chinese interpretations of various sociopolitical concepts arguing that a discernment of the different meanings is necessary to understand subsequent actions and avoid confusion and fear specifically mccoys explores how chinese domestic policy narratives reflect chinese political identity which in turn authorizes specific actions at the national and international level using post modern discourse analysis he examines the implementation of a chinese domestic policy known as ecological agriculture considering it as ritual myth and metaphor his analysis reveals the power relations and forms of interaction within and between diverse social groups that are an integral part of chinese

instruments and cooperation formats on a bilateral sub regional interregional and multilateral level in which states pursue different strategies for the assertion of interests result in constellations that can be favourable but are often problematic for the conclusion of free trade agreements ftas the eu only recently having started to develop a common foreign policy and institutionalising relations with partners on a bilateral interregional and multilateral level is not free from this problem following an incoherent foreign trade policy in which it shifts from bilateral south africa to interregional south east asia an mixed strategies south america the union faces challenges in the conclusion of interregional ftas a current example is the ongoing bloc to bloc trade negotiations with the mercosul mercado comum do sul in portuguese or common market of the south in english countries and the recent establishment of a bilateral sp with the mercosul member brazil that aims at cooperation on several topics including trade in the literature attention has been paid to regionalisation and interregionalism as well as the duality of the eu s biregional relations and bilateral sps creating chances and limits of global policy making but although trade has played a prominent role in the study of interregional relations attempts to link the duality of biregional and bilateral approaches in eu foreign policy with foreign trade policy making have been modest this study provides an in depth analysis of the impact of the eu s bilateral sp with third states on the union s ability to conclude ftas with economic blocs the sp is integrated with a single case study focusing on the coexistence of interregional eu mercosul fta negotiations and the bilateral sp between the eu and brazil analyses the sp s value as an eu foreign policy instrument for the enhancement of negotiations on interregional ftas

master s thesis from the year 2014 in the subject politics general and theories of international politics grade 80 100 university of leicester department of politics and international relations course international relations language english abstract the question of whether states pursue absolute or relative gains in international politics has divided neo realism and neo liberalism for quite some time now thus whereas neo realists contend that states seek comparative advantages relative to other actors neo liberal scholars argue that they are primarily interested in the accomplishment of absolute individual gains in applying social constructivist ideas however this paper will attempt to demonstrate that such a preference for relative or absolute gains is not naturally predetermined but inextricably linked to the continual re construction of states national identities and interests in other words it is political actors own conception and definition of international relations which ultimately determines their concern for absolute or relative gains by analyzing the decision making process of the truman administration for using nuclear weapons against the japanese cities of hiroshima and nagasaki in august 1945 this case study will show that american leaders were altogether much more preoccupied with achieving absolute rather than relative gains such absolute considerations were simultaneously influenced by the pressures of an anarchic self help system as well as by specific domestic imperatives and the personal views of individual policy makers on how to best handle international problems and exigencies more concretely american decision makers believed that only the realization of absolute gains such as swift socio economic recovery and the creation of a more stable and peaceful security environment would ultimately ensure their country s long term international position in both absolute and relative terms
